

The premium event for IT-professionals

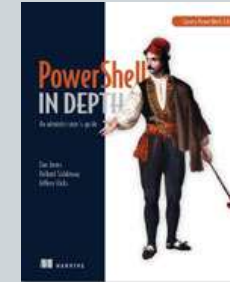

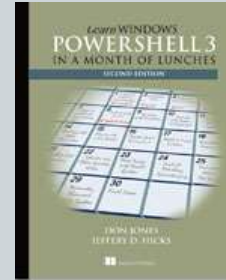

Feb. 1-3rd in Oslo Spektrum

Secrets of PowerShell Remoting

@JeffHicks

Who the heck are you?

Agenda

Managing at
Scale

Using SSL

CredSSP and
the 2nd Hop

Implicit
Remoting

Requirements

PowerShell v4
or later

- Not covering PowerShell 6 (Linux/macOS)

Admin rights
on all servers

AD Domain
recommended

- AD PKI helpful

PowerShell
Remoting
Enabled

MANAGING AT SCALE

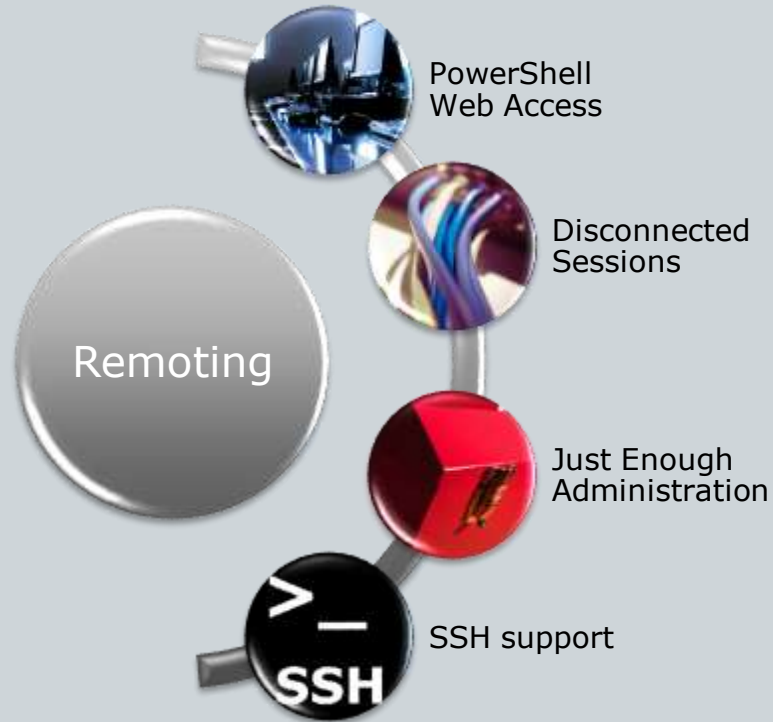

USING SSL

CREDSSP

IMPLICIT REMOTING

POWERSHELL REMOTING IS THE FIRST STEP NOT THE FINAL STEP.

But wait there's more...

Recommendations

Think and plan for
managing at scale

Implement SSL
for additional
security

Plan and test
PowerShell
remoting in your
network

CredSSP should
be an exception
not the rule
